

LECTURE 4 — ENERGY GENERATION

PHY199-RAP · Energy in the 21st Century

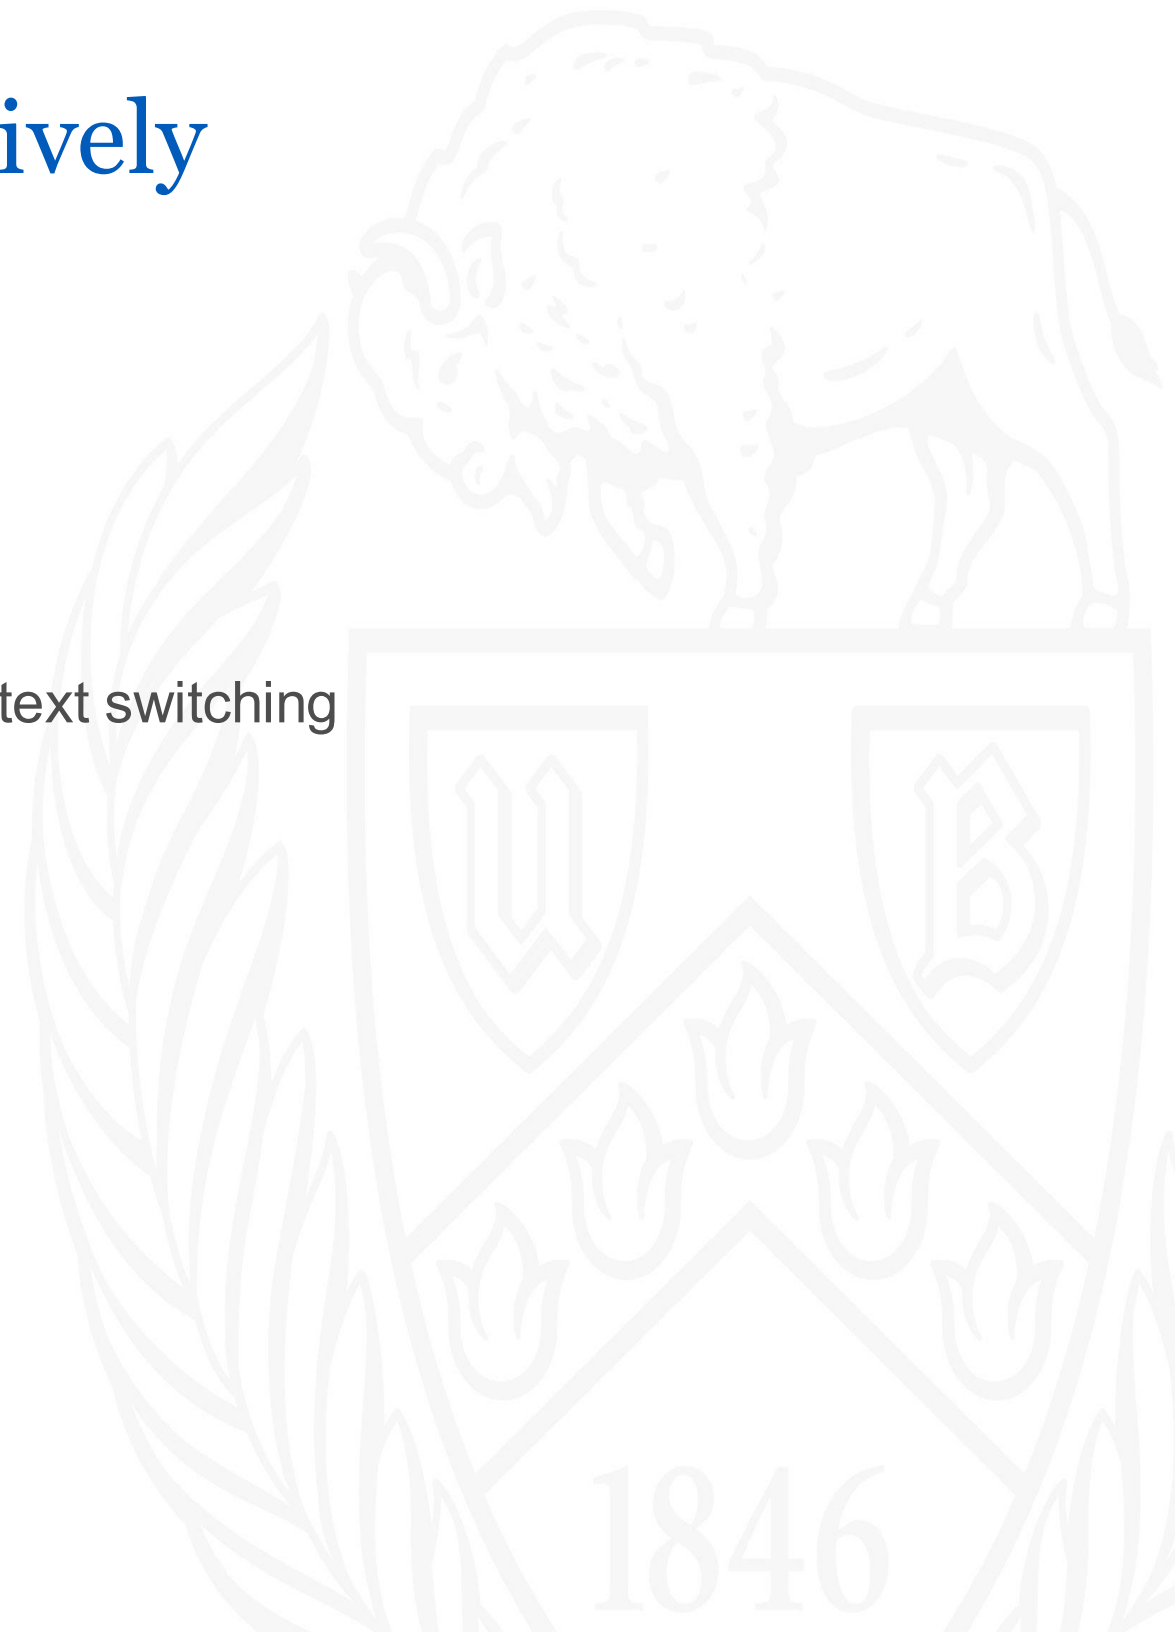

Dr. Salvatore Rappoccio

 **University at Buffalo** The State University of New York

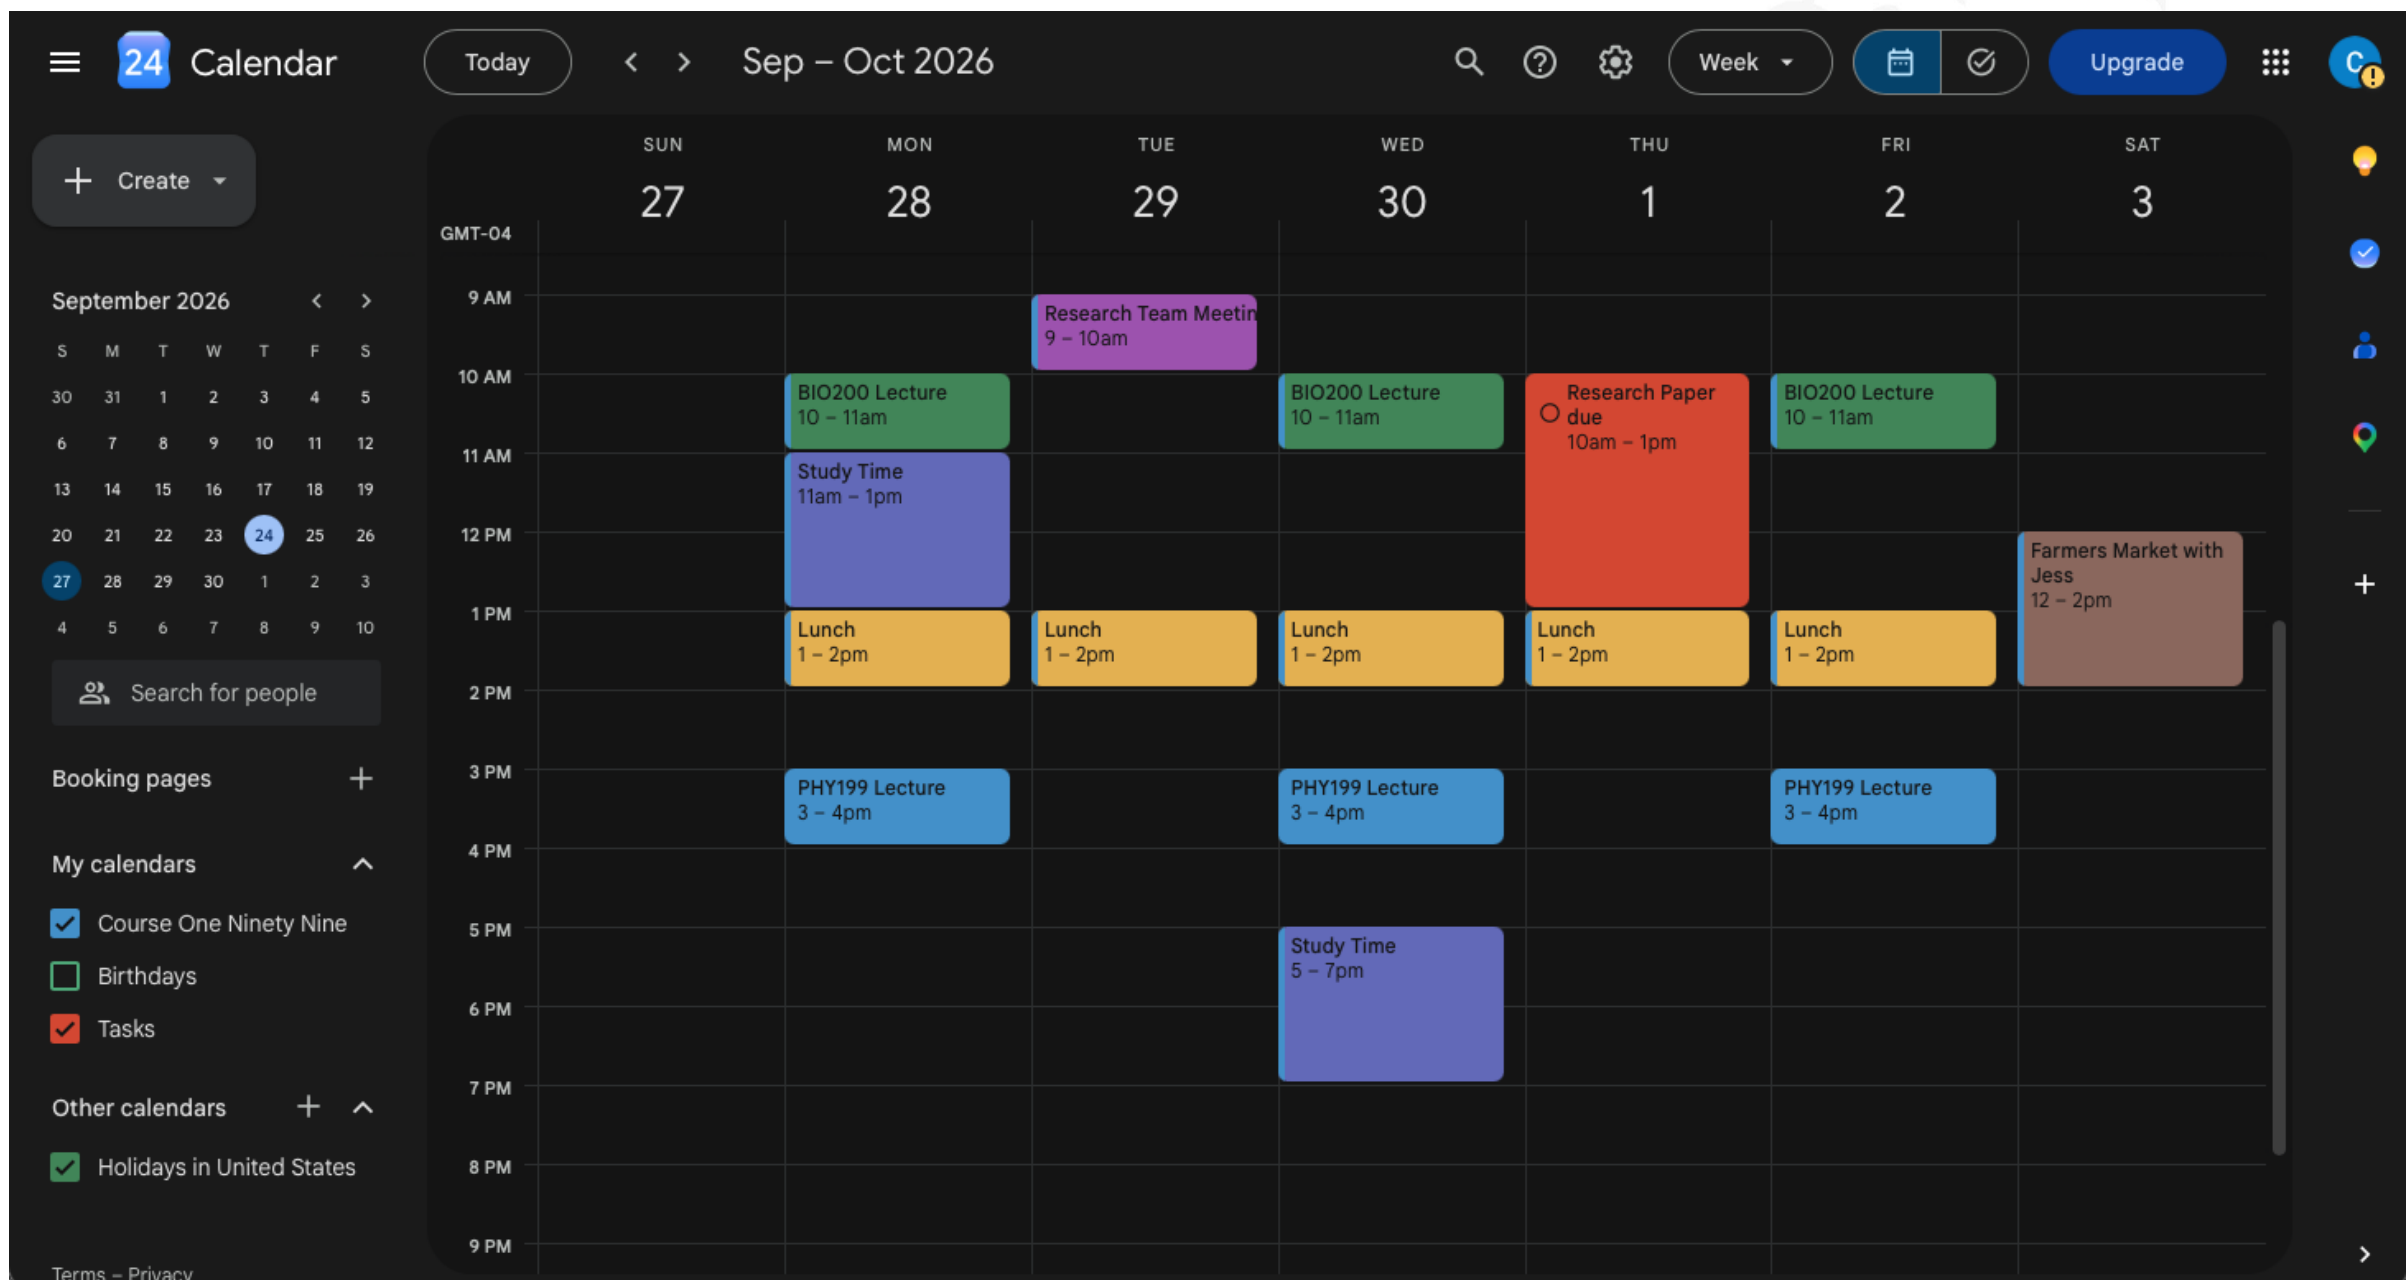

1846

How to manage your time effectively

- Use a calendar and mark urgent items
- Develop a consistent work schedule
- Prioritize your tasks by urgency
- Keep records of your progress to “save state” while context switching
- Be sure to rest and maintain work/life balance

Use a calendar and mark urgent items

The screenshot displays a calendar application interface. At the top, the header shows the current date as 24, the month as September, and the year as 2026. The main calendar grid is a weekly view spanning from Sunday, September 27, to Saturday, October 3, 2026. The time slots range from 9 AM to 9 PM. Various events are scheduled, including lectures (BIO200, PHY199), study time, a research team meeting, a research paper due, and a farmers market. The left sidebar provides additional context, showing a month view for September 2026, a search bar, and a list of calendars (Course One Ninety Nine, Birthdays, Tasks, Holidays in United States).

Day	Event	Time
SUN 27		
MON 28	BIO200 Lecture	10 – 11am
MON 28	Study Time	11am – 1pm
MON 28	Lunch	1 – 2pm
MON 28	PHY199 Lecture	3 – 4pm
TUE 29	Research Team Meeting	9 – 10am
TUE 29	Lunch	1 – 2pm
WED 30	BIO200 Lecture	10 – 11am
WED 30	Lunch	1 – 2pm
WED 30	PHY199 Lecture	3 – 4pm
WED 30	Study Time	5 – 7pm
THU 1	Research Paper due	10am – 1pm
THU 1	Lunch	1 – 2pm
FRI 2	BIO200 Lecture	10 – 11am
FRI 2	Lunch	1 – 2pm
FRI 2	PHY199 Lecture	3 – 4pm
SAT 3	Farmers Market with Jess	12 – 2pm

Be sure to rest and maintain work/life balance

- Outside of your scheduled work and practice time, GO HAVE FUN
- Touch grass
- Talk to humans
- Do video games
- Pet a cat
- Play soccer
- Sleep in
- Have a nice breakfast with friends
- Dance
- Be joyous

Develop a consistent work schedule

- I tell this to all of my graduate students too
- Work specific hours. It doesn't have to be M-F 9am-5pm, but block out times and **stick to them**
 - Block them off in your calendar
 - You will not run out of tasks, but in the odd event that you do, PRACTICE
 - Homework problems
 - Dance routines, Music performances, etc
 - Case studies
 - Whatever your discipline requires, do it often

**Practice
practice
practice!**

Prioritize your tasks by urgency

- Options can include :
 - Keep a daily to-do list
 - Use your email directly (make a “tasks” folder, email tasks to yourself)
 - Apps like [Obsidian](#)
 - Websites like [Trello](#)

Keep records of your progress to “save state” while context switching

- Keeping a log of what you do is very useful (or even required) in a lot of fields
 - Programming
 - **AI workflows! ABSOLUTELY CRITICAL**
 - Research
 - Clinical work (required often by law)
 - Law
 - But hell, why not keep a log of what you need to do to finish your book that you’ve been writing for, oh I don’t know, 15 YEARS
GEORGE!
- This allows you to migrate between tasks that need to be done and assist in time management
- Software options : Text editors (google docs, word, obsidian, other markdown editors), project management tools, log books

Monopoly (Custom Stake Edition) — Implementation Plan for Claude Code

Project Summary

A faithful Monopoly board game in Python + pygame, for 2-6 players. The only rules modification: a **Game Manager setup phase** lets a human operator assign each player's starting cash before the game begins (instead of the standard fixed amount).

author of Game of
Thrones

This is also how to use AI effectively!

- It requires careful planning of workflows
- Your calendar is a workflow! Your to-do list is a workflow!
- Doing these tasks is increasingly important as AI begins to take over more and more of the workforce.
